## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Fangmann et al. '396. Fangmann et al. '396 shows in Figures 1-3 a cutter assembly (10) comprising an adapter (12) with a bottom and an outer surface having a cutter hole (24) defined in the bottom of the adapter and partly defined by a bottom face, a drill hole (23) defined in the bottom face defining the cutter hole and co-axial with the cutter hole, a first threaded hole (32) defined in the outer surface of the adapter and in communication with the cutter hole, a second threaded hole (48) defined in the outer surface of the adapter and in communication with the drill hole, a cutter body (14) detachably attached to the adapter and having a base with a top and a bottom, a post (30) with an outer periphery extending from the top of the base and received in the cutter hole in the adapter and having a first facet (36) defined in the outer periphery of the post, a central hole (18) axially defined through the post and the base, a cylindrical saw (14) formed on and extending from the bottom of the base, a central drill (16) with an outer periphery detachably mounted on the adapter and extending through the central hole in the cutter body and received in the drill hole in the adapter, a second facet (44) defined in the periphery of the central drill near the first end (46), a first positioning screw (34) screwed through the first threaded hole in the adapter and having a free end abutting against the first facet on the cutter body and second positioning screw (50) screwed through the second threaded hole in the adapter and having a free end abutting against the second facet on the central drill. Fangmann et al. '396 shows a Application/Control Number: 10/633,529

Art Unit: 3722

first stop (portion indicated at 30 adjacent to first facet 36) formed on the post of the cutter body

adjacent to the first facet to abut against the free end of the first positioning screw. Fangmann

et al. '396 shows a second stop (at 46) formed on the central drill adjacent to the second facet

to abut against the free end of the second positioning screw.

2. Any inquiry concerning the content of this communication from the examiner should be

directed to Michael W. Talbot, whose telephone number is 571-272-4481. The examiner's

office hours are typically 8:30am until 5:00pm, Monday through Friday. The examiner's

supervisor, Mr. Boyer D. Ashley, may be reached at 571-272-4502.

In order to reduce pendency and avoid potential delays, group 3720 is encouraging

FAXing of responses to Office Actions directly into the Group at FAX number 571-273-8300.

This practice may be used for filling papers not requiring a fee. It may also be used for filling

papers, which require a fee, by applicants who authorize charges to a USPTO deposit account.

Please identify Examiner Michael W. Talbot of Art Unit 3722 at the top of your cover sheet.
